

Summer Math Practice

Dear Parents,

Students will work on IXL for Math during the summer months.

Please be sure that you are logged on with your child's username and password.

Please complete the diagnostic and that will give them an action plan. Once that action plan is created, it will give them recommendations.

On the website, students will work under the heading Learning. Under that section there will be those recommendations for their needs.

It is recommended that you work about 30-60 minutes weekly in order to maintain progress made from this year and also to prepare them for the upcoming year.

Teachers will check your work and progress throughout the summer months.

Mrs. Pannullo

Ms. Spellman
